

PRODUCT: GRO-LAC® COLOR CONCENTRATE AND STAIN BASE

CODE: 151-0001

TYPE: ACRYLIC CONCRETE STAIN

PRODUCT DESCRIPTION: GRO-LAC® Color Concentrate and Stain Base is a quality waterborne acrylic that penetrates and seals porous concrete-based substrates.

USES: GRO-LAC® Color Concentrate and Stain Base may be used to enhance the appearance of stamped concrete: raised surface areas will appear lighter and the indented formed surface will appear darker heightening the two-dimensional effects of the stamp.

SURFACE PREPARATION: All surfaces must be clean, dry, and free of grease, oil, and sealers, etc.

APPLICATION AND CLEAN UP: GRO-LAC® Color Concentrate and Stain Base is used directly out of the container without thinning. It is supplied in a two-package system for ease of use. The Base is supplied clear and the GRO-LAC® Color Concentrate and Stain is a premixed color that is added to the base. Mixing is very easy and assures better color control with no packing of color pigments. The two-package system must be mixed together well before use and during use. A variety of colors are possible with this type of system. May be applied with roller, brush, low pressure airless, or lawn and garden sprayer. Also may be applied with a spray bottle for small areas. Do not apply in temperatures lower than 45 degrees F. Apply by flooding surface for best results.

Wash hands and all tools with warm, soapy water after use.
