

PRODUCT: TRANSSEAL® OPE (OVEN PARTICLE ENCAPSULATOR)

CODE: 989-4300

SERIES: OPE

TYPE: DRY ADHESIVE ON FOIL CARRIER SHEET

PRODUCT DESCRIPTION: TRANSSEAL® OPE (Oven Particle Encapsulator) is a 2 mil foil, coated with a heat-activated non-silicone adhesive. This material, when heated in an oven, collects airborne dust particles. May also be used to eliminate airborne dust particles in spray booths. This product is provided in roll form.

SPECIFICATIONS: 2 mil solid foil rolls coated with a dried non-silicone adhesive.
Oven Temperatures: This material has been tested at 180 degrees F up to 400 degrees F for 7 days and activates within these ranges.

Application: To attach foil to walls and to tape seams, use Nashua Foil Insulation Tape, Product No. 324A U.L.

PRECAUTIONS: Use leather gloves when cutting or applying this product. Keep hands off of the adhesive as touching will hinder dust encapsulation. For industrial use only.
