

**PRODUCT:** TRANSSEAL® 7102 SEAFOAM

**CODE:** 989-7102

**TYPE:** PEELABLE AQUEOUS EMULSION

**PRODUCT DESCRIPTION:** TRANSSEAL® 7102 SEAFOAM is a peelable coating specially formulated for the protection of bathtubs and shower stalls in the new construction business during the building process. This coating provides excellent protection from scratches, dings, marring and severe scuffing. It is non-adhesive, making the removal process easy.

**USES:** May be used on composites, fiberglass, various plastics, metal, and many other surfaces.

**APPLICATION:** Apply with airless spray equipment (tip size: 4-11, 3-13, 3-15). Apply straight from container without thinning. Apply 12 to 14 mils wet to achieve acceptable peelability. All substrates should be tested for peelability before complete application of this product. Do not apply to porous surfaces. Allow 24 hours for total drying.

**REMOVAL:** After material is dried thoroughly, start at corner and peel up into a continuous sheet. May be wetted down before removal with water to help release if necessary.

**CLEAN UP:** Clean all equipment after use with warm water.
